Falls the SHADOW

Throughout April
Eleven Fine Art

Natasha Kissell's paintings explore the distance between the desire for a perfect utopian existence and the reality of decay and morality. Visions of natural splendor are juxtaposed with crumbling, vandalised walls and clapped out cars. It's a very different way of looking at how humans have impacted the natural world.

WORLD WOODLAND GARDEN

1 April

Chelsea Physic Garden

Celebrating forest environments from around the world and the medicinally useful plants they produce, this garden will help the visitor to see how humans have used plants in the past and how they will continue to be used in the future.

NORMAN LONG

From 21 April

The Osborne Studio Gallery

Depicting moments of life in the City, each of Norman Long's paintings suggest a little drama beneath the surface. The mini dramas that Long so skilfully describes through paint have been described as "longing for connection" and are truly brilliant.

© CRAIG WYLIE

CRAIG WYLIE: NURSE

1-28 April

Jonathan Cooper Park Walk Gallery

Oil painter Craig Wylie unites the past with the present with modern idioms, rich colour and subtle detail. Isolating the organic subject of his work on a backdrop of abstract colour, he balances the modern and the traditional in a simple but effective manner.
